

ADJUSTABLE LEG LENGTH AND STANCE

The standard leg tube adjusts from 28" for when you need to shoot sitting on the ground, up to 40" high for sitting on a chair and even higher with 50" tubes for standing.

CARRYING HANDLE/ SHOULDER STRAP

Moving the lightweight tripod is easy using the adjustable carrying strap.

The bench model has no-mar rubber feet that will not scratch the hood of your vehicle. It gives the same movement and accuracy as the original tripod, but weighs only 7 pounds! The base can be purchased separately for use with the top half of your standard tripod. Converts in 30 seconds.

It may also be used at a shooting range to sight in your gun.

The clamp tripod can be clamped onto the opening of a window in a tree stand or hunting blind.

THE ULTIMATE TRIPOD

SO EVEN THE SHAKIEST SHOOTER CAN MAKE THOSE "ONCE-IN-A-LIFETIME" SHOTS, EVERYDAY!

PROUDLY MADE IN THE U.S.A.

Specially designed free floating pivot with tension adjustment moves in all directions simultaneously and stays on target.

Constructed of powder coated aluminum and hardwood.

NO WIGGLE, JIGGLE OR BOUNCE for the most long distance hits.

The smooth movement of the fine adjustment for elevation and windage is reversible for left handed shooters.

Covered with leather, the cradles are adjustable for the balance of your rifle and can be modified to fit your stock.

An optional front cradle block is available to accommodate forearms up to 3" wide. The rear cradle block is thickly padded for recoil protection.

For extremely heavy or long barrel firearms, use 36" upper tubes to get the rifle to balance.

Handsome enough to display your firearm and also versatile for cleaning and servicing.
